The only thing that's certain is that new challenges and opportunities will emerge that are virtually unimaginable today. How can we know which skills will be required to succeed? In *Five Minds for the Future*, bestselling author Howard Gardner shows how we will each need to master five minds that the fast-paced future will demand: The disciplined mind, to learn at least one profession, as well as the major thinking (science, math, history, etc.) behind it; The synthesizing mind, to organize the massive amounts of information and communicate effectively to others; The creating mind, to revel in unasked questions - and uncover new phenomena and insightful apt answers; The respectful mind, to appreciate the differences between human beings - and understand and work with all persons; The ethical mind, to fulfill one's responsibilities as both a worker and a citizen. Without these minds, we risk being overwhelmed by information, unable to succeed in the workplace, and incapable of the judgment needed to thrive both personally and professionally. Complete with a substantial new introduction, *Five Minds for the Future* provides valuable tools for those looking ahead to the next generation of leaders - and for all of us striving to excel in a complex world. Howard Gardner, cited by *Foreign Policy* magazine as one of the one hundred most influential public intellectuals in the world, and a MacArthur Fellowship recipient is the Hobbs Professor of Cognition and Education at the Harvard Graduate School of Education.
