It is highly correlated with clay content and other soil properties that we can map. Therefore, it is important to integrate map-ping and monitoring techniques with predictive models for different soils and ecoregions. The understanding of soil carbon dynamics is advancing. We now know we must look at more than the total carbon pool in the soil. We need to look at each of three carbon pools that are found in soil. These are the labile pool, which has a turn over rate of less than a year; the intermediate pool, which has a turn over rate of 10 to 100 years; and the stable pool, which has a turn over rate of 100 to 1000 years. If we are to create and maintain a sustainable environment, our goal for soil carbon should be to increase the intermediate and stable pools. Management...
