University Press of Florida. Hardback. Book Condition: new. BRAND NEW, Gulf Coast Archaeology: The Southeastern United States and Mexico, Nancy Marie White, Native peoples living around the Gulf of Mexico had much in common, from the time of the earliest hunter-fisher-gatherers onward. There have been hypotheses of prehistoric interaction between the southeastern United States and Mesoamerica, but explorations of the processes have been few. This volume chronicles the archaeological continuities and discontinuities along the Gulf Coast from Archaic through Postclassic/Mississippian times and later, including shell mounds/middens and estuarine adaptations, subsistence similarities, the relationship of early settlement and sea level rise, cultural complexity, early monumental construction, long-distance exchange relations, and symbolism and iconography. Many debatable issues are explored. Northeastern Mexico is a region relatively remote from the Mesoamerican heartland, as is coastal Texas from the southeastern United States. The connecting area of the south Texas/Mexican coast may have been too inhospitable for much habitation, thus inhibiting interaction, yet some artifact types and styles, not to mention food crops, crossed these boundaries. The long-distance diffusion of ideas of sociocultural complexity, food production, and monument construction are reexamined in Gulf Coast Archaeology with new data and wide geographic perspectives. This book is an important contribution to the hypothesis of prehistoric culture contact and interaction between native groups in North America and Mesoamerica, which has been an openly debated topic over the last century.
