Excerpt: .This belt may be put on open or crossed depending upon if the raising rollers are required to turn forward or backward. The stuff to be raised is guided through the machine by the rollers k, k, which receive their motion from the main shaft by pulleys and wheels. The number of the raising rollers which form the cylinder may vary, also the manner in which the stuff to be raised is guided around them, and through the rest of the machine. wd-mew-mg-M a mramL\$ dem to-raise+hem. alii-ea--l+eth--si+les-at-t-l+e-san e-t-irne= The countershaft or raising rollers may also be driven by chains, wheels, or cones. The invention consists substantially in forming a raising cylinder by rollers covered with cards or suitable raising material, which receive by means of driven countershafts an independent variable but known motion from that of the cylinder itself. Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that I make no general claim to forming raising cylinders by arranging around a shaft a series of raising rollers but what I claim is: -- (l-) Forming raising cylinders by arranging a series of suitably covered raising rollers round a shaft at equal distances from the same, which rollers are made to receive en--iede, ren-lent a variable but known motion from independent of that of the so formed raising cylinders themselves, by means of conntershafts or any other suitable...
