Reviews

A must buy book if you need to adding benefit. I have read through and i also am certain that i will likely to read through once again yet again in the future. Its been designed in an exceedingly simple way and is particularly merely after i finished reading this publication by which really modified me, modify the way i think.

(Mrs. Jacquelyn Gutmann)

BULLETIN VOLUME 107, PT. 1

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 100 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . . . in feeding a number of different species of animals--the larger the number the better--for a day or two exclusively upon the food. White mice, house mice, white rats, young dogs, See Appendix, p. 252, for method for the determination of acidity. The material under this heading was originally prepared by Dr. E. C. Novy, of Ann Arbor, Mich. Fishchoder, Leitfaden der praktischen Fleischbeschau; Ostertag, Handbuch der Fleischbeschau; Walley, A Practical Guide to Meat Inspection, pp. 233-245. cats, rabbits, or guinea pigs may be used. If the animals sicken and die, they are to be subsequently examined for the presence of pathogenic bacteria. It may happen that none of the animals thus fed will be injured by the food, which fact would not exclude, however, the presence of a germ requiring a specially susceptible animal for a subject. Another set of animals should be injected with a cold extract of the meat made with sterile water. If the animals die, they are to be examined for pathogenic bacteria. A third set of animals should receive similar injections, though of larger portions, of this aqueous extract which has been previously filtered through sterile porcelain. If the animals die from such injections, the same as with unfiltered solutions, it is evident that a soluble bacterial chemical poison is present. The identification of the toxin produced by the germ is wholly out of the question. The most that can be done satisfactorily is to obtain, as above, a germ-free solution...
