Testing Truths: The Death of Freedom

By Dudley Williams

Paperback. Book Condition: New. Paperback. 306 pages. A collection of thought-provoking theories on how science affects our lives. To explore the problems of our origins, and what we are, we need to know which of the things that we learn in life are true or false and shades of probability between these extremes. The scientific philosopher Karl Popper pointed out that a hypothesis should be testable through experiment. It is then possible to prove if it is false¹ and, if false, must be rejected. If, on the other hand, the hypothesis passes all the experimental tests that have ever been made of it, it is called a truth. This book is a brief view of what has come to be over a period of 13.7 billion years; one not simply, collectively, and consequentially previously told. In the language of yesteryear, it takes us from bang to man; or in that of today, from forces to females. It briefly summarises the evidence that answers the child's question how did people get here. But more importantly, on the basis of this, and other, evidence, it then strives to answer their further question why do people do that. The answers challenge adults...
