University of Wisconsin Press. Paperback. Book Condition: New. Rachel D. Davis (illustrator). Paperback. 280 pages. Dimensions: 9.1in. x 6.2in. x 1.1in. Sedges are among the world's most diverse and ecologically important plant families, with almost two hundred species in Wisconsin alone. These grass-like plants, found mostly in wetlands, are increasingly popular with landscapers and home gardeners. Learning to identify sedges is challenging, however, and the available technical guides to the sedge family can be overwhelming to a nonspecialist. *Field Guide to Wisconsin Sedges* is a beautifully illustrated introduction to the largest sedge genus, *Carex*, which alone makes up about 7 percent of the flora of the upper Midwest. Written primarily for naturalists, wild plant enthusiasts, and native landscapers, this book is unique in its accessible format and illustrations. With this book, readers can learn to recognize key structures needed to identify approximately 150 *Carex* species found in Wisconsin. Author Andrew Hipp shows how to identify many of the major groupings of sedges that are used in guides to the genus throughout the world. *Field Guide to Wisconsin Sedges* includes information on habitat and range drawn from Hipp's extensive field experience and inspection of thousands of herbarium sheets. Primarily an identification guide, the book is also a valuable source of habitat information for landscapers, gardeners, and restorationists. Features: Keys to all Wisconsin *Carex* species, arranged by section Distribution maps for all species Species descriptions and detailed habitat information for more than 50 common species Color illustrations of whole plants or details for more than 70 species Appendix summarizing dominant *Carex* species by Wisconsin habitat A glossary of terms Water-resistant paperback cover This item ships from multiple locations. Your book may arrive from Roseburg, OR, or La Vergne, TN. Paperback.
