Excerpt: .the watch case to bulge outward a quarter of an inch at the center the proportions of the Navesink lens will be accurately represented, for it is five feet thick on the inside diameter. Ingress between the glistening shells is effected along the pedestal, and as there are sixty inches of space between there is sufficient room in which to move about. In the exact center of this space, and therefore precisely midway between the center of the bull s-eye in each half of the lens, is the arc light. Here Mr. Bishop discharged statistics like a mitrailleuse. It is the only electric light in use in any lighthouse in the country, he began. This arc lamp itself is of 7,000 candle-power, which will give you a fine estimate of the work of those long, glass triangles when you think that they throw the...
